

BALANCEASSESSMENT

BIDEX BALANCE ASSESSMENT FOR CONCUSSION MANAGEMENT

"Can I go back in coach?"

Until now, feeling good and testing strong were signs a team is ready to return an athlete to sports. However, recent indicators do not tell the full story of how the brain is healing. Athletes return at a high rate when they return activities too soon, starting the healing process all over again.

Bidex Balance Assessment tracks and tracks an athlete's progress from baseline to post-play stages of concussion. During healing rehabilitation testing, balance assessment is recognized as an essential component to cognitive testing. Working together, the assessment of other athletes can safely return to play.

Concussion is Serious!

Concussion...When is it Safe for Sports Again?
[Facility Name Here] has the answers through testing to keep kids healthy

(Town, State)—(Month, Day, Year)—*[Facility Name Here]* now offers Biodex Balance Assessment as part of a Concussion Management Program. Balance testing is a key component of best practices for concussion management and is endorsed as such by authorities treating this growing concern among school-aged children. Biodex Balance Assessment, available at *[office/facility]*, is used by leading hospitals, rehabilitation centers and national sports teams throughout the U.S.

The Centers for Disease Control (CDC) estimate up to 3 million sports-related concussions occur annually in the U.S., with school-aged children making up the majority of cases. Athletes returning to play prematurely are at a higher risk of injury and a second concussion. The rate of recurrence is just as concerning and can be more damaging.

[Facility Name Here] would like to take this opportunity to enroll athletes in a Concussion Management Program which includes a simple baseline test of balance, an important first step in the event of an injury in the future. The test takes only minutes, yet in the event of a concussion, provides valuable information which can be applied to post-injury evaluation and rehabilitation. Should a concussion occur athletes are retested and results are compared to the baseline as well as to age- and gender-specific normative data.

Biodex Balance Assessment for Concussion Management, along with guidance provided by *[Facility Name Here]* can dramatically aid in the healing process and provide post-injury testing to the benefit of the patient. Using the initial baseline test, a comparison report is created for the patient's physician to help determine the readiness of returning to school, sports and other activities. Biodex Balance Assessment helps determine where a patient is in the recovery process through the testing of balance and motor control while assessing any dizziness issues.

About *[Facility Name Here]*: Custom paragraph about serving the community.

About Biodex Medical Systems, Inc.: Biodex has been providing customers with innovative products and service excellence for more than 60 years with innovations designed to solve clinical problems and improve lives. www.biodex.com

Each ad can be customized with the facility name and contact information.

In an effort to help promote balance assessment, position your facility as a premier center for concussion management and to draw media attention, we have created a sample press release.

The sample press release is a Word document, allowing it to be easily edited to reflect your message.

ATHLETE RECRUITMENT

Poster

These posters are designed to help educate the public on the importance of baseline and post-injury balance assessment. The poster can be displayed in your own facility, or with partnering physicians or schools, to inform parents and student-athletes of baseline testing through Biodex Balance Assessment for Concussion Management.

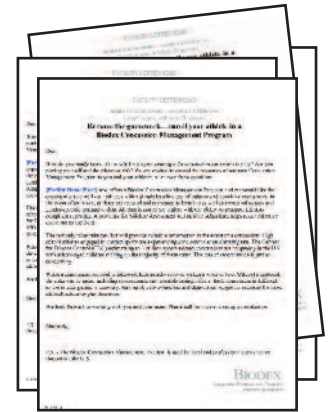

The poster can be printed either 11" x 17" for wall applications or 8.5" x 11" for desktop use.

COMMUNITY OUTREACH

Sample Letters

These sample letters will help you craft personalized letters to referring physicians, athletic directors, coaches and the parents of student-athletes in the community. The goal is to introduce Biodex Balance Assessment for Concussion Management and its value in providing objective data to help in return-to-play decisions.

The sample letters are in Word format allowing them to be edited to reflect your message.

Scroll Sign Graphic

Community outreach can foster a wealth of goodwill, as well as position your facility as a valued member of the community. Community events, school functions and educational forums can generate interest and build a relationship for future physical therapy requirements. In our effort to assist you, Biodex provides artwork for a scroll sign graphic that can be used at events.
